

ENTERPRISE DIGITAL ADOPTION SOLUTION

Built for the the size of your enterprise application adoption challenges

Opus gives your workforce the knowledge they need to do their jobs faster

Enterprise applications are complex. They can be difficult for users to adopt and learn how to use, slowing digital transformation and change management initiatives, and reducing your ROI on software investments. Epilogue Opus is an enterprise-class cloud-based digital adoption solution, that provides in-application, context sensitive support and guidance to users when they most need it – at the point of work, at their moment of need.

Better training, change management, and digital transformation outcomes

Because Opus delivers contextual guidance at the point of work, users are empowered to do their jobs better and more easily instead of searching for help or trying to remember what they learned in training - if they ever actually received training. This can aid in productivity acceleration through improved user adoption of new and updated applications, fewer user errors, and faster time to competency (TtC).

Opus is built to handle the scale of any or all your critical applications

Companies familiar with digital adoption solutions are familiar with their benefits. but also are familiar with how much effort and skill is required to use them. As a

WHY OPUS?

Improve User Adoption

Make applications easier to navigate and use effectively by deploying intelligent, embedded support across your entire application ecosystem.

Enhance User Proficiency

Increase knowledge retention by guiding users through complex tasks at the point of work, where up to 70% of learning happens. Increased retention means more proficient users.

Bolster L&D Effectiveness

Train more users, more effectively, and in less time with in-application guidance, while allowing L&D professionals to focus on more high-value

Stay on top of it all

Built-in workflow manages projects, teams, tasks and content and operational analytics help understand the health of your digital adoption efforts.

result, most digital adoption solutions have a limit on how broadly they can be used. Not so with Opus. Opus is so easy, anyone with subject expertise in an application can use Opus to create the digital content to help other users. Opus has an intuitive user interface and streamlined features that makes Opus the easiest digital adoption solution to use. And, as an additional benefit, because Opus is SCORM and Tin Can/xAPI compliant, you can leverage its content into your existing LMS and eLearning tools

Cloud Based Performance Support

No need for on-premise hardware or maintenance and support contracts; SaaS subscription model makes everything easier.

Utilization Reporting

Monitor activity, users, content and utilization.

Single Source Editing

Edit one file and updates are automatically deployed to all associated assets.

Distributed Authoring

Leverage application SMEs when recording and editing learning content by having them record critical tasks and processes.

Modern, Intuitive User Interface

A clean, simple UI makes Opus a breeze to use for admins, authors, editors, and end-users.

ODARC File Conversion

Because you can convert UPK ODARC files for use in Opus, you can continue to use and build on your existing content library.

Backup and Disaster Recovery

Ensure business continuity with built-in backup and disaster recovery.

Tin Can/xAPI and SCORM Compliant

Opus works with your LMS, helping to enhance existing L&D efforts.

Our team chose Opus for its ease of use and ability to meet the diverse needs of our company. We are excited about Opus's direction and leadership in the performance support field.
